Is your data storage in sync with your organization’s goals?

An as-a-Service model can help

APEX Data Storage Services are on-demand, on-premise solutions. They provide cloud-like storage services – SAN, NAS, or file. You can work with your own data and have the flexibility of using the APS or the Dell Cloud.

SIMPlicity

- Simply pay for what you use
- No fixed costs or commitments
- Easy to deploy and manage
- No contract for multi-year
- No hidden fees

AGILITY

- Scale your capacity as your needs change
- Add or remove storage as your application demands
- Keep storage close to your application for lower latency
- Add or remove storage as your application demands

CONTROL

- Secure your data with encryption
- Control access to your data
- Keep your data where you need to
- Secure your data with encryption
- Control access to your data
- Keep your data where you need to

APEX radically simplifies your storage

and reduces costs. It’s your data, your way.

How it works

APEX gives you the flexibility to choose your own cloud provider. You can select the data services, the storage services, or both.

We can help you with your APEX journey. We’ll work with you to ensure you have the right storage solution for your needs.

APEX Navigate your entire IT Journey

You’ll have the ability to see the entire journey with APEX. You’ll know where you are and where you’re going. You’ll be able to see the benefits that APEX brings to your organization.

We’re here to help. Let’s talk about APEX. Contact us today to see how APEX can help your organization.
