

STREAMLINE AUTOMATION FOR

Dell APEX Navigator with the APEX Terraform Provider

Easily automate Dell APEX Block Storage for AWS management activities including:

Deployment

Rapidly deploy Dell storage software in AWS to meet demanding and diverse workload requirements.

Data Mobility

Move data between Dell APEX Block Storage for AWS and Dell PowerFlex on-premises to support shifting cloud strategies.

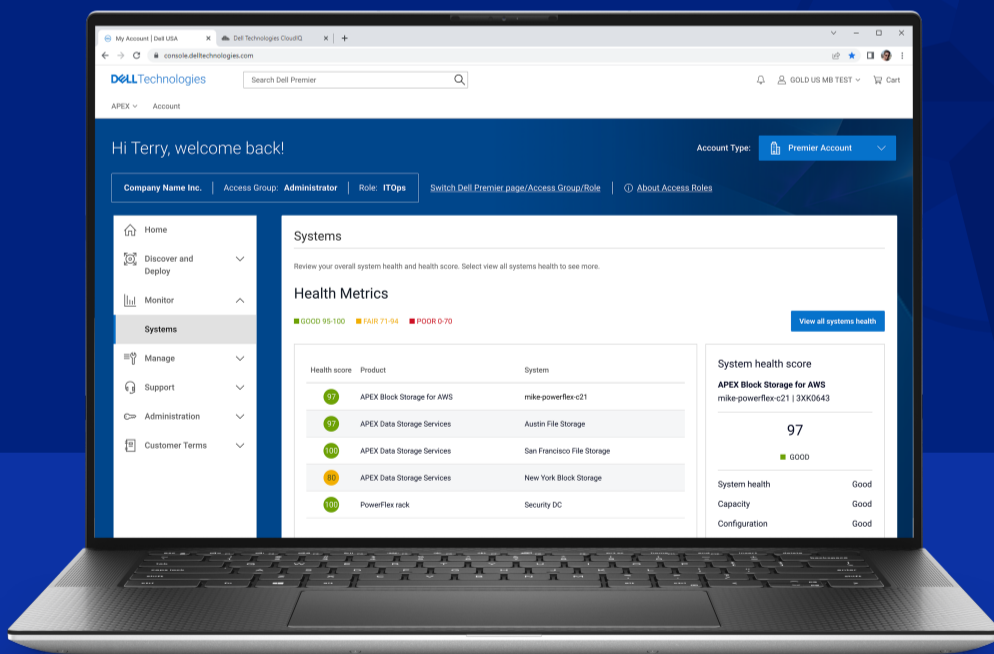

Decommissioning

Ensure cloud resources are decommissioned to minimize risk and reduce potential cost over-runs.

[Click here](#) to bookmark the central Hashicorp Terraform registry to access the APEX provider and get updates on Dell storage software and additional cloud providers to support demanding workloads like GenAI at scale.

DELL APEX NAVIGATOR FOR MULTICLOUD STORAGE

Unlock a new standard of excellence for multicloud management and operations

Eliminate siloed experiences with centralized management of Dell storage software across multiple public clouds.

- Simplify multicloud storage management
- Configure, deploy, monitor, and manage Dell storage in public clouds
- Ensure seamless data mobility across on-premises and public clouds
- Maintain security and facilitate Zero-trust adoption
