

Rise Up to Cloud

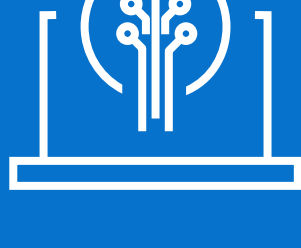

Without Compromise

Run RISE with SAP on Dell APEX,
powered by Intel technologies,
in your data center

Why RISE with SAP?

Migrate your SAP ERP to the cloud with confidence

RISE with SAP® is a bundle of software, best practices, and outcome-driven services for guiding you along a personalized path to the cloud.

Future-proof your business

with transformation
as-a-Service.

Accelerate innovation

with a quick value
obtainment.

Achieve predictable, lower TCO

with pricing and
infrastructure
optimization.

SAP is partnering with Dell Technologies and Intel® to give you the option of running RISE with SAP on Dell APEX for the multicloud experience your business needs.

Top 3 reasons to choose Dell APEX for RISE with SAP

Take your cloud journey, your way, with Dell Technologies, Intel and SAP

No matter which path to cloud you follow, you'll get there faster with SAP-certified Dell infrastructure, powered by Intel technologies and delivered via Dell APEX.

1. Value

Shift the focus from
managing IT to delivering
better business outcomes.

Speed access to more data

with SAP instances on purpose-built Dell servers
powered by Intel® Xeon® Scalable processors.

Streamline lifecycle management

by shifting time-consuming, labor-intensive tasks
to Dell APEX.

Simplify the service experience

with quick provisioning and a modern
consumption model.

Integrate seamlessly

with your specifications and requirements to help
achieve desired outcomes.

Improve operational efficiencies

with Dell and Intel energy-efficiency innovations
designed with sustainability in mind.

2. Innovation

Respond and adapt to
ever-changing business needs
with agility.

Deploy flexibility

in data centers, colocation facilities or
multicloud locations.

Contain costs

with a pay-per-use model and clear
cost transparency.

Scale dynamically

with the ability to spin up SAP-validated
systems in minutes.

Eliminate capacity guesswork

with usage-based subscriptions.

Perform near-real-time analysis

with massive, high-speed memory capacity
at the source.

3. Security

Reduce risks with end-to-end
control and protection for SAP
landscapes and data.

Keep data within the SAP landscape

to satisfy compliance needs.

Protect intellectual property

by isolating critical applications and
restricting access.

Extend cyber resiliency

and take control of your security via
threat-detection services.

Meet stringent security requirements

with dozens of Dell APEX assurance programs that
enable continuous compliance and audit readiness.

Enable hardware-based security

from Dell and Intel including accelerated encryption,
workload isolation and advanced technologies to help
defend against sophisticated cyberattacks.

The power of partnership

Dell Technologies, Intel and SAP are driving next-generation
capabilities from the edge to the core to the cloud.

Rely on industry leaders.

Two decades of working
together to deliver
winning outcomes to
more than 15,000 joint
customers globally.

Deploy jointly developed solutions.

Certified resources are
designed to ensure
seamless integration and
provide a high potential
for optimization.

Benefit from the community.

End-to-end global solution
providers ecosystem
empower your business
with the best-fit solutions
and latest technologies.

Claim your home cloud advantage

Attain cloud capabilities while keeping your SAP landscape in your own data center with Dell APEX, giving you the power of joint Dell Technologies, Intel and SAP solutions with pay-per-use flexibility to handle enterprise scale.
