The Transformative Power of APEX Data Storage Services

An as-a-Service portfolio of scalable and elastic storage resources designed for OpEx treatment

Focus on outcomes, not infrastructure

On-premises storage environment challenges

- Unpredictable data growth
- Wasted expense associated with over-provisioning
- Time and cost devoted to administrative activities

APEX Data Storage Services simplifies the storage process.

- Get complete oversight of your storage resources
- Gain freedom from the hassles of day-to-day data storage management

APEX Data Storage Services enables customers to avoid many of the challenges associated with traditional on-premises storage models.

Simplicity

Remove complexity to deliver more value to your organization

Agility

Manage unpredictability by responding dynamically to changing business needs

Control

Reduce risk with flexible storage services that enable a true hybrid cloud strategy

120+

IT decision-makers responsible for storage were interviewed by Forrester.

Customers experienced or expected to experience:

- Reduced cost of on-premises storage infrastructure
- Improved efficiency of storage professionals
