Predictable monthly pricing

At a predictable price from one trusted provider

• Scale up/down depending on needs
• Worry-free comprehensive security
• Cloud-based, zero-touch device set-up
• Seamless systems management and software integration
Dell makes it easy to integrate AI into your business.

Dell Technologies has the broadest AI portfolio from deskside to data center to cloud - all in one place.

As a company, we have invested in expanding our technological portfolio to help our customers bring AI to their data faster and more efficiently. Getting the latest Dell PCs with Windows 11 is crucial in your AI journey as this particular transition serves as an inflection point of starting to enable some of these AI efficiencies now and in the future.

73% of respondents from the KPMG report believe generative AI will increase workforce productivity.

Link to report

Delight the end-user

- Broadest selection of designs with powerful fixed workstations with more memory and storage to the most scalable mainstream laptops and mobile premium laptop designs our competition can't match
- History of delivering productivity-enhancing AI optimizations with the world’s most intelligent PCs since 2020. And now, Copilot for Windows adds even more.

Simplify IT

- Dell has the industry’s most secure commercial PCs with Dell Trusted Workspace. Unique telemetry integrations with AI-enabled cybersecurity software help reduce the attack surface and improve long-term cyber resilience.
- Our portfolio of professional services empowers our customers to build a future-ready IT environment and invest in new technology with ease.

Advancing sustainability

- Improve energy efficiency on devices with AI-based Dell Optimizer and optimize your AI investment through Dell’s Professional services to reduce waste and lower energy costs.
- Option to responsibly retire hardware with Asset Recovery Services and recover value to invest in new AI PCs, ensuring a sustainable and seamless transition to advanced technology.
Sustainable devices

At Dell Technologies, sustainability is a core part of our business. We have a responsibility to protect and enrich our planet together with our customers, suppliers and communities. As a result, we embed sustainable and ethical practices into all that we do, being accountable for our actions while driving improvements wherever and whenever possible.

Over 400 EPEAT® registered client products.

Use of 100% recycled and renewable materials in our new commercial notebook packaging.¹⁹

Up tp 85% post-consumer recycled plastics in our products.¹⁰

Up to 60% recycled material across the OptiPlex portfolio.¹¹

World’s first

Windows PCs and workstations to use 25% hydropower-produced and 75% recycled aluminum.⁸

¹ In Latitude 9440 and Precision 5680 mobile workstation.

Dell displays and peripherals

Modern workers need end-to-end solutions that connect seamlessly no matter where work happens. Get the most out of your workday with a full Dell solution, including PC’s, monitors, accessories and software designed and tested to work better together. Choose from our broad portfolio of peripherals and services to get the best PC experience.

Better Together

Designed and tested to work seamlessly together with Dell systems. Now you can conveniently purchase from a single source that offers a wide portfolio of displays and accessories worldwide, backed by world-class service and support.

Purpose-built

As the world’s number one monitor company,¹² Dell knows that the modern workplace requires more than just PCs. Our displays and accessories are designed with unique features built-in, to make your life easier and help maximize your productivity.

Intelligence

Dell Displays and Peripherals are crafted to support intelligent experiences. We offer the World’s 1st 5-star certified Eye Comfort Monitors¹³ and the most intelligent portfolio headsets in its class¹⁴ with features to maximize efficiency and enable smarter collaboration.

Dell Asset Recovery Services

We are committed to accelerating the circular economy and offer responsible, secure commercial asset management for retired technology of any brand. When a customer retires their equipment using Asset Recovery Services, we work to extend the life of those products and materials by prioritizing reuse with whole unit resale, refurbishment, and harvesting parts where possible. All other materials are responsibly recycled. Recovering those products and materials through responsible retirement benefits our planet and our collective businesses.

Plan in advance for asset recovery at the end of the PC lifecycle and transition end-users into new technology faster.

95% of all systems returned to Dell Financial Services gained a second life by being refurbished and reused.15

APEX PCaaS Services Delivery Manager

We’ll work with you to build a solution for your unique business needs.

For orders that include 300+ systems, we assign a Services Delivery Manager (SDM) as your single point of contact. The SDM will help streamline communications and assist you in all phases of the PC lifecycle, including planning to deployment, support and management through asset recovery and refresh.

Your single point of contact for the PC lifecycle

- Across your business and into Dell
- Provides periodic program status updates and results
- Reduces program complexity by coordinating deliverables

An expert, knowledgeable resource

- Certified in IT industry standards e.g., ITIL, Six Sigma
- Leverages experience from projects completed
- Responsible for services delivery

Your customer advocate

- Works as part of your program team
- First point of accountability
- Executive point of contact
Dell ProSupport Suite for PCs

Initiate device driver and firmware updates for an entire fleet in as little as 37 seconds.16

Using SupportAssist AI technology, ProSupport Suite for PCs provides predictive alerts to help you stay ahead of issues. Proactive support helps you quickly repair both hardware and software problems. Priority access to ProSupport engineers gives you 24x7 support. And, automatic alerts and case creation allow Dell experts to start working on solutions before you ever make a call — saving time, money and frustration.

**ProSupport Plus for PCs**
- Support anywhere, 24x7
- Actionable fleet health scores
- Automate custom update catalogs
- Deliver seamless remote updates
- Customize rules for automated remediation
- Protect against accidents

**ProSupport for PCs**
- Support anywhere, 24x7
- Monitor the health of your Dell fleet
- Resolve existing issues quickly
- Discover utilization trends

Dell Managed Services for the Workplace

A dependable, modern, and secure end-user experience on all devices.

Dell Managed Services solves hardware lifecycle management challenges with a solution-based approach that address both IT pain points as well as end user experience issues. Leveraging the global strength and scale of Dell’s world class portfolio, we accelerate customer outcomes, freeing our customers from tedious and time-consuming tasks to focus on their business-led IT initiatives.

**Manage the PC lifecycle beyond day one with Dell Lifecycle Hub.**
By bringing together deployment, warehousing, and inventory management services along with return, repair and redeploy, we ensure our customer’s devices have more than one life by cascading reclaimed devices to end users within their organization. We manage new hire requests and device refresh, repairs through whole unit exchange, returns from leavers and even set up EOL devices for disposition, all delivered through the Lifecycle Hub.

**Get a handle on your PC environment with Hardware Asset Management.**
Dell will track and optimize the lifecycle, performance, and utilization of our customer’s IT assets. By doing so, they will reduce the risks and costs associated within the PC environment and help inform future IT decisions.

**Keep PC fleet refreshes on track and on budget with Device Refresh Management.**
When customers need help refreshing to new technology, Dell provides on-going planning, forecasting, and supply chain management to enable timely, targeted multi-vendor device rollouts. With automated interactions and communications, the device refresh process is easy for IT and their end-users.
Dell ProDeploy Client Suite and Dell Connected Provisioning

Relinquish the tedium, not the control.

Deploy efficiently
Direct every deployment detail with an unprecedented level of control, automation and simplicity through the Service Intelligence online portal.

Deploy expertly
Trust Dell experts and partners to lead deployments from project management through planning, configuration and installation.

Day one productivity
Dell Connected Provisioning allows for factory provisioning, managed from the cloud, to deliver devices to end users faster and easier.

50% decrease
in employee device deployment time

Secure anywhere-work with Dell Trusted Workspace

Hardware and software defenses built for today’s cloud-based world.

IT teams are responsible for more devices, applications and data than ever before. Defending against constant attacks requires both hardware- and software-based protections. A trusted IT and security partner to organizations worldwide, Dell Technologies, not only builds security into its products – it builds products securely with strict supply chain controls.

In addition we give customers the option to layer on intelligent endpoint security software and services for additional peace of mind. Together, this holistic suite of solutions helps to minimize the attack surface and improve long-term cyber resilience.

Improve fleet-wide security with Dell Trusted Workspace

Reduce the attack surface with the industry’s most secure commercial PCs featuring protections competitors cannot match:

Be secure from first boot
Rigorous supply chain controls and Dell unique Secured Component Verification reduce the risk of product tampering.

Spot ticking timebombs
Early alert feature indicators of attack, offered only by Dell, scans for behaviour.

Stay protected from evolving threats:
Only Dell offers off host BIOS and firmware verification, providing greater security than other PCs.

Layer on advanced threat protection with software from our ecosystem of best-of-breed partners (E.g., CrowdStrike, Absolute).
