
NEXT- GENERATION HUMAN-SCALE INTELLIGENCE

Autonomous Floor Scrubbing

MULTI-ROLE VEHICLE

A New Way Forward

Until now, scrubbing robots have been sold the way that eBay sell socks; with predictable results – robots frequently get stuck or lost, cyber-security is like Swiss cheese, and support is non-existent.

Cyberworks Robotics has taken a revolutionary new integrated holistic approach to robotic scrubbing in partnership with a global Dream-Team of the world's most experienced and well-known tech brands to provide a turnkey white-glove solution. No more lost robots, the gold-standard in cyber-security and on-site support within hours anywhere in the USA.

Our next generation scrubbing robots combine our proprietary AI foundations with advanced Machine Learning to provide total reliability unseen in past technologies.

A Total Solution

Stress-Free Automation, Custom-Fit for You

Cyberworks delivers a full-service robotics solution—expertly tailored to your operations, with smooth, day-one integration.

White Glove Experience

We begin by getting to know your existing workflows inside and out. From there, we design and implement solutions that not only fit—but elevate—your operations, driving greater efficiency and delivering a best-in-class experience.

TRUSTED BY THE WORLD'S LEADING BRANDS

 BlackBerry

 DELL

 SUMITOMO 

Today, our advanced solutions are being embraced by a growing number of top-tier brands around the world—proof that experience and reliability matter when it comes to cutting-edge automation. Join the movement and discover how Cyberworks Robotics can help your organization work smarter, move faster, and lead with confidence.

ABOUT US

Unique Features

- 01 Safety That Reacts**
With ultra-fast obstacle detection and evasive
- 02 Moves with Precision**
Pinpoint navigation within 5cm, even in tight or busy spaces like checkout aisles.
- 03 Reverse Motion**
Able to back out of dead-end aisles and blocked passages.
- 04 Playlists**
Clean different zones in large facility in any order you wish to accommodate other work crews and priorities.
- 05 Nonstop Power**
Ready for back-to-back shifts thanks to long-lasting lithium battery performance.
- 06 Certified & Reliable**
The world's only safety-certified OS, plus tech that recovers from hiccups for seamless operation.
- 07 Smart Diagnostics**
Blackbox predicts failures and helps technicians troubleshoot swiftly.
- 08 Remote-Ready**
Staff can easily control PMP via mobile devices—responsive, smooth, and always ready.

Trailblazing Robotics Since 1987

At Cyberworks Robotics, innovation isn't just a promise—it's our legacy. As the world's longest-standing autonomous mobile robotics company, we've spent decades pioneering the smart technologies that others are only just discovering.

1984: Cyberworks Robotics' founder with the world's first fully autonomous industrial mobile robot – as reported in the New York Times.
