

Dell Trusted Workspace Built-on security

Software to improve the security of any fleet

Thwart advanced cyberattacks with Dell SafeGuard and Response

Prevent, detect and respond to threats wherever they occur. Artificial intelligence and machine learning proactively detect and block endpoint attacks, while security experts help hunt for and remediate identified threats across the endpoint, network and cloud.

Dell Trusted Workspace Hardware-assisted security

Integrated security

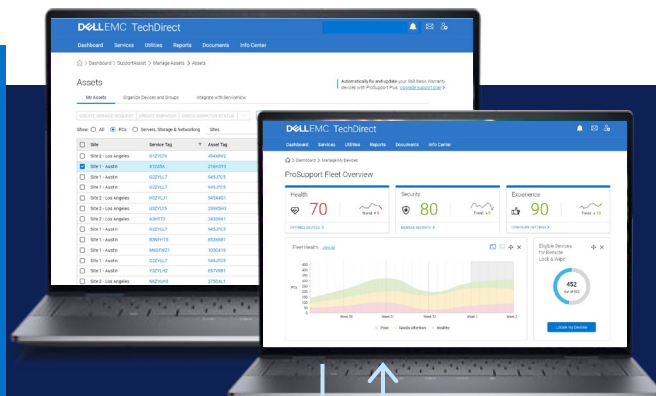

Evolving cyber threats circumvent software-only defenses. Help shrink the attack surface of endpoints with **hardware-assisted protections**.

To protect against modern threats, hardware and software defenses must work together. That's where Dell can help. We work with industry-leading security partners, combining rich, device-level telemetry with cutting-edge threat detection to improve the security of your fleet.

- ✓ Reduce the attack surface
- ✓ Improve threat detection
- ✓ Maintain device trust
- ✓ Consolidate providers
