

Dell SafeGuard and Response

CrowdStrike Falcon® Endpoint Protection Enterprise On-the-Box (OTB)

Key Benefits

- Helps stop breaches and simplifies endpoint protection
- Helps provide unparalleled real-time and historical visibility across endpoint events and activities
- Helps accelerate investigation and remediation and ensures stealthy attacks don't go undetected 24/7

Cloud-native Platform

- Reduces cost and complexity by eliminating the need for constant signature updates, on-premises management infrastructure and complex integrations
- Enables fast deployment and rapid operationalization — without requiring a reboot after installation
- Full, automated protection across endpoints without impacting endpoint performance and end-user productivity

Stop breaches with full endpoint protection

Built to help stop breaches, CrowdStrike Falcon® Endpoint Protection Enterprise On-the-Box (OTB) unifies next-gen antivirus (NGAV), endpoint detection and response (EDR), USB security, and breach prevention in a single cloud-delivered agent.

Falcon Endpoint Protection Enterprise OTB At-A-Glance

Feature	Falcon Endpoint Protection Enterprise OTB
FALCON PREVENT™ NGAV	✓
FALCON INSIGHT™ XDR / EDR* Endpoint Detection and Response	✓
FALCON DEVICE CONTROL™ USB Security	✓
FALCON THREAT GRAPH STANDARD Brief Prevention Engine	✓
CROWDSTRIKE ESSENTIAL SUPPORT	✓

Key product capabilities

AI-Powered NGAV

- Protects against the spectrum without requiring daily updates
- Combines prevention technologies — machine learning, AI-powered indicators of attack (IOAs), exploit blocking, high-performance memory scanning and more — to stop ransomware and fileless attacks
- Covers gaps left by legacy AV and protects endpoints online and offline

Intelligent EDR

- Prevents silent failure by capturing raw events for automatic detection of malicious activity, providing visibility, proactive threat hunting and forensic investigation
- Unravels attack in the easy-to-use CrowdScore™ Incident Workbench enriched with context and threat intelligence data
- Provides powerful response action to contain, investigate and remediate compromised system

Device Control

- Provides detailed visibility on USB device usage
- Enables granular policy enforcement to ensure control over USB devices used in the environment

Breach Prevention Engine

- The CrowdStrike Security Cloud leverages Threat Graph to correlate trillions of security events per day with indicators of attack, threat intelligence and enterprise telemetry from across customer endpoints, workloads, identities, DevOps, IT assets and configurations.
 - Prevent threats in real time, with AI-powered analytics and threat intelligence
 - Investigate threats quickly, reducing time-to-respond
 - Hunt proactively for stealthy threats

CrowdStrike Essential Support

- | | |
|--|--|
| <ul style="list-style-type: none">• Prioritized case handling• Quarterly health checks and reports• Knowledge transfer opportunities• Access to CrowdStrike's team of technical account managers (TAMs) for product advice and issue escalation• Enhanced knowledge base• Premium video and webinar content | <ul style="list-style-type: none">• 30 days of personalized onboarding support• Invitations to Beta Programs• Periodic proactive calls from a TAM• Reports covering the overall health of your CrowdStrike deployment, best practices, tuning, case status and reviews of new product features and capabilities |
