Dell SafeGuard and Response

CrowdStrike Falcon[®] Spotlight[™]

Key Benefits

- Automate assessment for vulnerabilities with the Falcon sensor on all of your endpoints, whether on or off the network
- Shorten time-to-respond with real-time visibility into vulnerabilities and threats in your environment
- Prioritize and predict which vulnerabilities are most likely to affect your organization with ExPRT rating
- Use intuitive dashboards to get the vulnerability data that is relevant to your organization, or create custom dashboards
- Bridge the gap between security and IT tools with always-available, on-demand vulnerability data and patching orchestration
- Initiate emergency patching for critical vulnerabilities with native Falcon integrations

Real-time vulnerability management and prioritization

CrowdStrike Falcon[®] Spotlight[™] provides an immediate, scanless solution for comprehensive vulnerability assessment, management and prioritization for IT analysts. Built on the CrowdStrike Falcon[®] platform, it offers vulnerability prediction and dynamic rating capabilities as well as intuitive reports, dashboards and filters to help your IT staff improve your security posture.

Using Falcon Spotlight, you can see the vulnerabilities exposed within your organization's environment and easily prioritize these with the Exploit Prediction Rating AI (ExPRT.AI) model. ExPRT.AI relies on a vast database of sources, including CrowdStrike's own threat intelligence, to enable you to more accurately prioritize vulnerabilities that are critical to your business. After you've prioritized your vulnerabilities and remediations, use the built-in integrations with the Falcon platform to deploy emergency patches, create custom dashboards to monitor your remediation efforts, and kick off external IT workflows with reports, integrations and APIs.

D&LLTechnologies

Powered by the CrowdStrike Security Cloud and world-class AI, Falcon Spotlight sits within the CrowdStrike Falcon Platform, leveraging the single lightweight-agent architecture. With Falcon Spotlight continuously monitoring for vulnerability exposures, IT staff will always have access to up-to-date information, with virtually no impact to your endpoints.

Key Capabilities

Reduce Vulnerability Prioritization Effort

Falcon Spotlight is a dynamic vulnerability management solution equipped with intuitive dashboards and powerful filtering capabilities, enabling you to improve your organization's security posture by serving up the most relevant information. Dashboard capabilities include:

- **ExPRT rating:** Immediately prioritize which vulnerabilities are truly relevant to your organization with a dynamic rating that more accurately shows risk levels. The rating is adjusted according to a vast database of source data.
- Exploit status: Using integrated vulnerability exploit and threat intelligence, you can easily identify which vulnerabilities in your environment represent the greatest risk and build reports and dashboards that keep track of these vulnerabilities.
- **Recommended remediations:** Ensure that your remediation efforts are reducing the most risk. Falcon Spotlight intelligently recommends the highest-impact patches to deploy, reducing the chances of deploying a superseded patch.
- **Installed patches:** Use the Installed Patches page to identify which patches are active across your environment, or which patches have been installed but are pending a reboot.

Automate Vulnerability Assessment

Take advantage of the Falcon platform and lightweight agent to eliminate the burden of lengthy, performance-impacting scans. With scanless technology, automated data collection and a real-time user interface, your IT staff gains

a continuous, comprehensive picture of all endpoints in your organization — no more outdated reporting or long scans slowing down regular business processes.

Improve Security Operation Efficiency

Streamline your vulnerability management program with custom dashboard features. Create and save custom filters so staff can quickly navigate and research critical issues. Use the custom team dashboards to share insights across your entire team and set remediation timeframes to speed vulnerability resolution and increase your team's efficiency.

Reduce Overall Complexity

Falcon Spotlight does not require an additional agent, and endpoints no longer need to use cumbersome hardware or weighty agents or be on the network to be assessed. Falcon Spotlight is always on, seamlessly bridging the gap between vulnerability management and the rest of the Falcon platform, enriching threat detection and intelligence use cases. Simply select a vulnerability within the dashboard to see a wealth of data around threat actors, including threat intelligence reports and additional insights. Since all data is housed within the same console, analysts can pivot quickly to those vulnerabilities that show the most significant risk to resolve them first.

For hosts with critical vulnerabilities that need remediation instantly, IT staff can take advantage of emergency patching — it's a simple one-click action for Windows patch updates.
