Unlock the Value of Oracle.

Dell Technologies delivers IT solutions designed to optimize your Oracle experience.

Business apps and processes are becoming more data driven. And with this, the database platforms they run on are advancing too.

84% of organizations feel that the amount of resources spent on ongoing database management is severely limiting their competitiveness.

No surprise — IT rethinks deployment strategies for Oracle.

Traditional business applications are critical components of transformation initiatives.

IT needs a strategy that embraces a cloud operating model with optimal placement of Oracle mission critical systems that can operate in a multivendor landscape.

Dell Technologies believes the information in this document is accurate as of its publication date. The information is subject to change without notice.

84% of organizations use at least one emerging technology — AI, IoT, digital assistants, blockchain — to enhance finance and supply chain operations.

The Dell Technologies approach

Business apps and processes are becoming more data driven.

And with this, the database platforms they run on are advancing too.

43% of organizations feel that the amount of resources spent on ongoing database management is severely limiting their competitiveness.

No surprise — IT rethinks deployment strategies for Oracle.

Traditional business applications are critical components of transformation initiatives.

IT needs a strategy that embraces a cloud operating model with optimal placement of Oracle mission critical systems that can operate in a multivendor landscape.

We focus on three key areas to help you optimize Oracle IT investments and experience a truly data-driven business:

1. Consolidate and simplify storage.
2. Run Oracle in the interconnected business ecosystem.
3. Secure business and developer productivity with data.

Get started today.
