

Rugged. Secure. Customized.

Designing technology solutions that drive
Defence through digital transformation.

Data is at the center of digital disruption.

Emerging technologies like edge, Internet of Things (IoT), cloud computing, big data and artificial intelligence (AI) are critical for the defence sector to strategically manage data.

Gain competitive advantage by designing solutions to automate and accelerate battlefield intelligence, operations and decision-making. When trust and security are imperative, Dell Technologies OEM Solutions is the partner you need to design the high-performance systems necessary for success.

Enhance Preparedness

- Strengthen capabilities across land, sea, air, space and cyberspace.
- Provide real-time intelligence to soldiers, agents and government organisations.

Increase Mission Effectiveness

- Deliver cost-effective technologies that work.
- Execute tactical and strategic initiatives across joint forces.

Enable Cyber-Readiness

- Protect sensitive data from the world's most sophisticated attackers.
- Reduce cyber-risk without limiting the availability of intelligence.

Your mission, designed your way.

End-to-end expertise to enable your success.

Collecting, storing, processing and analyzing data is essential in successfully driving the defence sector through digital transformation. Enhanced security may be required to protect data. Or data collection may occur in places where it's never been collected before. All of this leads to better and more strategic decision-making. That's where we come in.

Dell Technologies OEM Solutions helps defence organisations with the right products and engineering to design any solution.

Standard

Globally available off-the-shelf Dell Technologies products and solutions from edge endpoints to ruggedized field grade systems to micro data centers and cloud compute platforms.

OEM

OEM-specific products and capabilities to meet defence industry needs.

Stability. Longevity. Visibility.

Extended life & stability
OEM XL | XE offerings.

Ruggedized

Military certified, rugged
products and solutions.

OEM-Ready

De-branded products
that you can add your
brand to with OEM-Ready

Custom

Make your ideas a reality by partnering with our technology experts for fast to market delivery of branding, personalization, fit & function and specialized environment design custom solutions.

Solutions from OEM Customers

Addressing unique industry needs with turnkey solutions designed by our customers and delivered through Dell Technologies.

Engineered to perform.

Together we design to your requirements.

Unique environments and applications often require unique hardware configurations. We have a dedicated engineering team that can tailor and fully customize products to meet specific electrical, mechanical, software and systems requirements.

Stability. Longevity. Visibility.

Long-term XE | XL products for innovation.

OEM XE and XL Platforms come with in-advance visibility to key product transitions and changes that effectively help you maximize your resources and budget. An up to 9–15 month product transition period upon launch of the next generation products means your time is spent on innovation and competitive differentiation, not development churn.

Smooth transitions.

Ensure maximum lifecycle through changing technology and requirements.

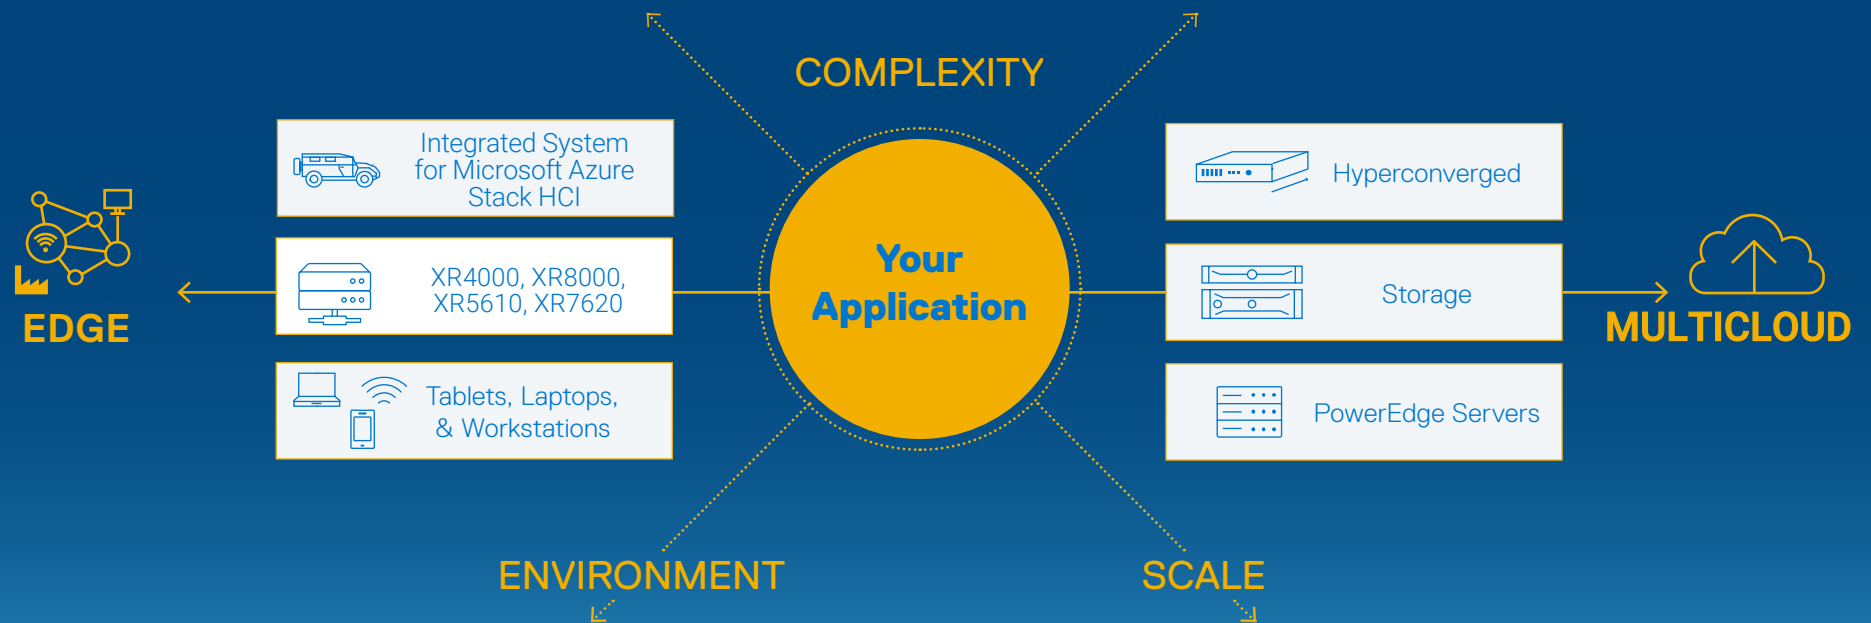

The Dell ImageWatch tool provides advance notifications of upcoming changes to Dell Technologies platforms, critical hardware, and software components, all at no cost. By importing a quote ID into your ImageWatch dashboard, you can get an on-demand view and proactive email alerts of transitions for your solutions.

Tested. Trusted. Tier-1 infrastructure.
Elevate application performance and reliability.

Next Gen OEM Solutions.

Engineered for your unique application regardless of complexity, environment or scale.

SECURE | MANAGEABLE | OPTIMIZED | SUPPORTED

A multi-disciplined collaboration.

Our dedicated OEM Solutions team solves complexity so you don't have to.

Complex projects require building intricate teams that are hard to hire, expensive to retain and difficult to manage. By collaborating with us, you will have access to broad and deep expertise across all functions and industries, and more than 55,000 Dell Technologies and partner professionals around the globe.

Offers from OEM Solutions can help customers:

- Focus on their IP and competitive differentiation, not the hardware it runs on.
- Customize solutions for when standard off-the-shelf offerings don't meet the need.
- Make customer transitions easier and less disruptive with long-life solutions.
- Protect sensitive data and enable cyber-readiness.
- Replicate success at scale by leveraging global and secure supply chain and OEM support services.

About OEM Solutions.

OEM Solutions partners with customers to design their innovative in-market solutions by leveraging Dell Technologies tier 1 infrastructure and capabilities including engineering, program management, global support, global secure supply chain, and much more. This allows companies to bring ideas to the world faster, create better customer experiences and drive their customers' digital transformation.
