

Dell AI for Telecom Certification Program

Certify your Telecom AI solution to stand apart in the market and drive innovation

The Challenge

Differentiating Your Telecom AI Solutions in an Up and Coming Market

AI is transforming the Telecom industry, turning ideas into reality, from AI assistants to predictive maintenance

Telecom AI Vendors need to cut through the noise by building credibility and trust in their AI solutions

The Solution

The Dell AI for Telecom Certification Program

- Certify and optimize your solutions on Dell’s telecom AI infrastructure for CSPs.
- Gain market recognition through Dell Technologies Telecom Certification.

Telecom AI Certification

Telecom AI Self-Certification	Validates integration, function and stability.	
Telecom AI Solution Certification	Validation of Telecom AI use-cases in simulated CSP environments.	

- Build credibility and trust in a dynamic and evolving landscape.
- Validate solutions that are reliable, compatible and optimized for telecom infrastructure.

The Benefits

Boost Credibility, AI Innovation and Market Success

Gain Recognition and Credibility

Boost credibility, market access, and revenue by aligning with Dell Technologies. Certification badge assures CSPs of compatibility, builds trust, and be part of a prestigious ecosystem.

Unlock Access to Advanced Telecom AI Infrastructure

Access Dell’s advanced labs and AI platforms to test and optimize Telecom solutions for 5G and edge. Exclusive access to AI servers helps boost performance, ensuring efficiency for Telecom AI workloads.

Establish Trust in Telecom AI Solution Readiness

Ensure rigorously tested, validated, high-performance solutions for CSPs. Vendors gain trust, meeting top performance, compatibility and reliability best practices.

Why Choose Dell Technologies and OTEL?

Accelerating the Open Telecom Ecosystem

Global Reach

Leverage hybrid connectivity capability to collaborate on a global scale by securely networking our labs together from anywhere on the world.

Leading Edge Dell and Partner Technology

Give NEPs, ISVs, start-ups, and other Telecom vendors the ability to validate your software with access to latest Dell Technologies Telecom solutions.

Making Telecom Solutions Consumable

Accelerate time-to-value with multi-vendor system integration at scale, cloud operations modeling, multiple test-line configurations, and user-defined end-to-end and on-demand validation based on customer requirements.
