

Dell Connected PCs with Verizon

In a world increasingly reliant on seamless connectivity, the need for reliable and secure network access has never been greater. Dell Technologies and Verizon Business are introducing a new promotion aimed at meeting the evolving needs of modern businesses and ensuring that organizations across the U.S. can be productive from virtually anywhere by connecting to a secure cellular network.

Stay securely connected

A faster internet connection is not only desirable, it's essential. Today's workforce is more mobile than ever, and in the age of AI, where data-driven tasks are increasingly integral to operations, a faster cellular internet connection can become a necessity.

What's more, security is becoming increasingly critical to protect data and user privacy as well as to meet the ever-growing data and cybersecurity requirements in many industries.

Dell Connected PCs

Connected PCs are devices which can be configured with mobile broadband, so users and organizations can benefit from the powerful and secure capabilities of cellular 5G networks.

Unlike traditional fixed connections, cellular networks offer flexibility, reliability and greater security, ensuring seamless access to cloud-based AI applications and real-time data analytics from virtually any location.

Dell Technologies and Verizon Business are working together to deliver a seamless mobile broadband solution for organizations. Employees benefit from all the benefits of high-performance laptops, workstations and rugged devices combined with always-on, reliable and secure connectivity from virtually anywhere in the U.S. on the Verizon 5G network.*

How does it work?

Connected PCs are laptops with 4G LTE and/or 5G mobile broadband connectivity that work like smartphones to enable access to the internet when a secure Wi-Fi connection is not available.

When you purchase a Connected PC and opt-in, Dell will refer you to a Verizon Business sales representative to help you select and activate the best service option for your needs.

Dedicated help

Work with a dedicated Verizon Business sales and support team who can help identify the data plan and solutions that best meet your business needs.

Verizon Business promotion

Save \$200 when you activate a Dell Connected PC on an eligible Verizon Business data plan*.

Dell Connected PC Promotion with Verizon Valid on any BYOD connected laptop when enrolling in a new month-to-month agreement for 20 months and data plan \$34.99 or higher. \$200 credit will be applied over twenty (20) months provided eligibility requirements continue to be met. Verizon reserves the right to charge back to your account all or a portion of the value of any promotional credit received as part of this offer in the event eligibility requirements are no longer met. Any such charge back may be subject to the terms of your agreement. First credit will appear retroactively within 2 to 3 billing cycles following enrollment. May not change price plans to become eligible and must remain on the qualifying plan to retain discount. May be combined with other laptop service offers. Taxes and fees extra. Valid 1/8/2025 to 12/31/2025. **Verizon Coverage Map FAQs, www.verizon.com/coverage-map.
