TOP REASONS TO USE
live optics FOR
SAN HEALTH ASSESSMENT

10

Maximize application performance and reduce risk and cost from your Connectrix SAN environment

Live Optics with SAN Health is a free downloadable tool that creates comprehensive views and documentation including performance graphs, detailed spreadsheets and topology diagrams. Live Optics takes the comprehensive output and creates an easy to understand summary presentation to help you make important decisions.

1 | Live Optics with SAN Health is a free downloadable tool

You can download Live Optics with SAN Health. Find the instructions to download Live Optics and SAN Health below.

2 | Creates an inventory of all SAN devices

Live Optics with SAN Health creates an inventory including all Fibre Channel connected devices, all Fibre Channel switch and director models and firmware levels as well as HBAs.

3 | Provides a diagram of the Connectrix SAN environment

Live Optics with SAN Health provides greater visibility into your SAN and its components with a detailed Visio diagram and a comprehensive Excel report.

4 | Identifies areas for improvement

Live Optics with SAN Health discovers areas for improved zoning and switch and director configurations.

5 | Provides performance and SAN Congestion information

Live Optics with SAN Health identifies SAN performance bottlenecks and switch or director error conditions. Live Optics with SAN Health makes sure your SAN matches your storage performance.

6 | Supports Open Systems and Mainframe

Live Optics with SAN Health addresses your Open Systems Fibre Channel and Mainframe FICON environments.

7 | Provides insightful Topology Graphs

Graphs include detailed topology diagrams, port detail tables and fabric and zone summaries.

8 | Live Optics summarizes SAN Health data

Live Optics takes the SAN Health data and creates an easy to read presentation that helps you make important decisions about your SAN environment.

9 | Live Optics makes recommendations to increase performance and reduce cost

Using the data from Live Optics with SAN Health, including port utilization, end-of-sales and end-of-service-life information, etc., Live Optics makes consolidation and technology refresh recommendations.

10 | Live Optics with SAN Health helps you make important decisions about your SAN

Live Optics with SAN Health provide the information you need to quickly monitor the health of your SAN and make essential daily and long-term decisions.
