

Dell Technologies Quick Start Service for Microsoft Intune and Windows Autopilot

Microsoft Intune is a cloud-based service focused on devices management and application management which enables your workforce to stay productive while keeping your company data protected. As others Entra services, Microsoft Intune is available within the Entra portal.

MDM stands for Modern Device Management and is software that manages and secures smartphone, tablets, PCs and other endpoints. MDM is a core component of Unified Endpoint Management (UEM) which also includes mobile application management, identity and access management and enterprise file sync and share.

Dell Quick Start service helps customers configure their environment and prepare it for Modern Device Management and Modern Provisioning
