

Dell PowerProtect Data Manager

Next Generation Software Platform for Proven and Modern Cloud Data Protection.

Enable faster IT transformation

- Gain confidence your data is protected and available
- Safeguard VM workloads and containers
- Simple and flexible data protection
- Secure your multicloud workloads

Self-Service Backup & Restore

Central IT Governance & Oversight

Workloads

ORACLE | SQL | Exchange | SAP HANA
Filesystems | NAS | Kubernetes containers
VMware & open hypervisors

Solutions

Multicloud | VMware | Cyber recovery

Backup to the cloud

Send data directly to the cloud to maximize your investment & expand capacity.

Backup in the cloud

Deploy Data Manager in the cloud with automation to protect business-critical workloads.

Multicloud optimized

Extend data protection to the cloud

Long-term retention

Tier aging data automatically to the public cloud to meet compliance, lower IT costs & reduce on-premises footprint.

Cloud Disaster Recovery

Rapidly recover data & applications directly in the cloud.

Data Protection for Kubernetes

Discover	Manage	Protect	Restore
<ul style="list-style-type: none"> Automatically discover unprotected Kubernetes deployments Cloud-based monitoring 	<ul style="list-style-type: none"> Centralized management and governance Ensure compliance 	<ul style="list-style-type: none"> Orchestrate protection policies across distributed applications Protect cloud-native applications and databases 	<ul style="list-style-type: none"> Crash-consistent backups Point-in-time recovery

Protect VMware VMs without business disruption

Simplify VM image backups for near zero impact to your VMs or VM resources

VM backup protection without compromise & at scale

- Modernize how you protect VMs
- Simplify & automate VM image backup & recovery
- VMware-certified solution

Boost VM backup performance

- Up to 5x faster backups¹
- Up to 6x faster restores²
- Up to 5x reduction in VM latency³

Reduce costs & simplify management

- Zero proxies**
Proxies not required for data movement
- Storage agnostic**
Single VM backup that works with any VMware-supported storage
- Auto-scaling**
Orchestrated management via ESX-based plug-in without proxies and additional impact to the host

Cyber recovery

Increase business resiliency to rapidly recover from cyber incidents.

Protect business-critical data from ransomware and cyber attacks.

Identify signs of data corruption with machine learning and intelligent analytics.

Accelerate recovery of “known good” data to quickly resume business operations.

Flexible consumption

Simplify your experience to drive outcomes the way you want.

On-premises

In the cloud

<p>Software with Dell PowerProtect appliances</p>	<p>Simple integrated appliance</p>	<p>Deploy from AWS, Microsoft Azure and Google Cloud Marketplaces</p>
---	------------------------------------	---

Experience faster IT transformation & operational simplicity
