# Project Fort Zero

## Accelerate the path to Zero Trust

Dell will deliver a fully configured, end-to-end, validated Zero Trust solution.

### Will cover all 45 capabilities – mapped to the seven pillars – that organizes those controls.

- User
- Device
- Application & Workload
- Data
- Network & Environment
- Automation & Orchestration
- Visibility & Analytics

There is only

**1**

technology integrator:
**Dell Technologies**

**30+**

technology partners are contributing to the ecosystem

---

**Validated Zero Trust:** the government will certify the solution for maturity against the U.S. Department of Defense Zero Trust reference architecture

**The fully configured Project Fort Zero solution** will lower the barrier to Zero Trust adoption, reducing the estimated time for Zero Trust adoption through a private cloud.*
