

Professional Services for
Microsoft Copilot

Empower your teams to
achieve more with AI

Supercharge productivity & performance across your organization

By seamlessly integrating GenAI capabilities with everyday applications and workflows, Microsoft Copilot and custom Copilot solutions can enhance organizational efficiency in unprecedented ways. However, effectively harnessing these cutting-edge tools requires a strategic approach to ensure your data, environment and teams are primed to fully utilize them.

Our methodology for implementing Microsoft Copilot solutions and developing tailored Copilot agents extends beyond evaluating the readiness of foundational technologies to encompass an assessment of impact on processes, security and governance, as well as facilitation of technology adoption to equip your workforce to maximize the return on your investment.

Accelerate business outcomes with our Microsoft expertise

Rely on expert guidance from Dell Technologies to maximize business outcomes with Microsoft Copilot solutions and tailored Copilots. Our Microsoft-certified professionals will first assess your unique environment, gather requirements, and create a tailored plan for success. We handle implementation, testing, and prepare your team for seamless operations.

- ✓ Rapidly enable more efficient ways of working
- ✓ Confidently tackle AI data governance
- ✓ Accelerate adoption to maximize value
- ✓ Monitor impact across the organization

The demand for AI in the workplace is clear:

64% say they struggle to find enough time and energy to get their work done

70% say they would delegate as much as possible to AI to lessen their workloads

3x time in Microsoft Teams meetings and calls increased 3x per week since 2020

Accelerator Service for Copilot+ PCs

Accelerate innovation & productivity gains with optimized Copilot+ PC deployment

- Gain personalized recommendations aligned with your business needs and based on industry best practices to avoid pitfalls in Copilot+ PC rollout
- Optimize Copilot+ PC configurations and settings, develop a unified device management strategy, and explore Neural Processing Unit use cases
- Navigate a phased rollout with targeted guidance on key use cases and implementation of new features, using our piloting strategies to maximize outcomes

Services for Microsoft Copilot Studio & Azure AI Studio

Build bespoke solutions: your vision, our expertise

- Leverage our Microsoft and AI expertise to identify suitable use cases, review technology needs, and provide recommendations for Microsoft Copilot Studio or Azure AI Studio solutions
- Engage in flexible, two-week sprints to develop tailored workloads on Microsoft Copilot studio or Microsoft Azure AI Studio, with prioritized tasks and collaborative planning sessions

Implementation Services for Microsoft 365 Copilot

Drive productivity and efficiency to new heights

- Get started with a 1-week engagement featuring a Microsoft 365 Copilot readiness assessment including policy review and planning, plus an Adoption and Change Management workshop
- Extend your engagement up to 3 weeks to equip your teams with an initial Microsoft 365 Copilot rollout leveraging limited SharePoint sites, data preparation and verification, plus an adoption assessment and the knowledge to operationalize
- Expand your implementation for 5+ weeks to include additional SharePoint sites and users, plus extended adoption and change management planning and execution to drive utilization

Implementation Services for Microsoft Copilot in Windows

Leverage intelligent assistance and unleash creativity

- Get started with a 1-week engagement including assessment and design, platform and client readiness, implementation of Copilot in Windows, user onboarding, adoption planning and knowledge transfer
- Expand your engagement for up to 2 weeks, including additional Copilot in Windows users plus hands-on adoption and change management guidance from Dell experts

Implementation Services for GitHub Copilot

Empower your developers to become more innovative and productive

- Enable faster code generation and enhanced code quality using GitHub's suggestions resulting in quicker completion times and more enjoyable coding experience for developers
- Streamline workflows and automate repetitive tasks to allow developers to focus on more creative work
- Promote coding best practices and a more secure codebase

Implementation Services for Microsoft Copilot for Security

Equip your security teams to confidently outpace adversaries

- Get started with a 1-week engagement to equip your security teams with a highly tailored design and configuration, leveraging customized prompts and the ability to ingest data from additional security tools
- Extend the power of Copilot for Security with a 3-week engagement, providing capabilities to additional users, tenants and ensuring seamless 3rd party integration

Implementation Services for Microsoft Copilot for Sales

Access timely data, streamline processes and accelerate sales

- Kick-start your journey with a 1-week engagement featuring a platform readiness assessment, an adoption workshop and knowledge transfer to prepare for Copilot for Sales implementation
- Extend your engagement for up to 3 weeks, including implementation, CRM integration and customization plus adoption readiness and planning
- Further expand your implementation for up to 5 weeks, including additional users and CRM customizations, and hands-on guidance for adoption and change management
