

## Implementation Services for Microsoft Azure Public Cloud

# Create secure, future-ready cloud solutions on Microsoft Azure

## Leverage the benefits of Azure Hybrid and Multicloud

IT organizations who desire to move from a multicloud by default state to a multicloud by design state are facing the challenge of how to go about the transformation in a thoughtful way, bringing benefits to the business. They would need to consider what cloud landing zones would be the best place to run their existing applications and workloads, and which cloud services they should consume to best address their business objectives.

Microsoft Azure Public Cloud would be a choice many would consider, due to the many benefits it has to offer. Running Microsoft workloads in Azure as well as utilizing the same tools and services both on-premises and cloud, are just a few of these benefits.

## Harness our expertise to drive the outcomes you need

Whether you want to create a foundation for running workloads on Azure Public Cloud, extend cloud capabilities, or deliver on-demand scaling of VMs, rely on expert guidance from Dell Technologies to meet your goals for multicloud. Our Microsoft certified professionals will design and implement for your unique environment and put you on the path to success.

✓ Create a foundation on which to build and deliver on-demand cloud services
