

Dell Endpoint Security Services

Assess, defend and prevent threats to your business

95%

of security breaches occur at the endpoint.

Planning, Implementation and Sustain Services

Dell Endpoint Security Services

Today's marketplace has more security threats than ever before, making it a struggle to protect your data and prevent impact to your business. We are here to help answer the questions that keep you up at night — do I have the right solutions in place to protect my organization? Are my data and devices truly secure? How can I be sure?

Dell Endpoint Security Services blend comprehensive software options with personalized security expertise so you can identify risks, implement solutions and prevent against future threats with confidence.

First step to securing your data

Gain insight into the security status of every part of your IT environment. Our endpoint security assessments help to identify areas of improvement for data, devices, identity and applications. A detailed findings-report provides you with actionable and tailored recommendations to close critical security gaps and strengthen preventative measures.

Taking action to address threats

Once the endpoint security assessment is complete, your Dell security expert will review a range of implementation options to address identified threats. These options are designed to fit a variety of needs, will be tailored to your environment and based on best practices. You'll gain peace of mind knowing the right tools have been implemented efficiently and properly to defend your organization from the start.

Key benefits

- Understand the security status of each part of your IT infrastructure
- Learn what unique threats and vulnerabilities your organization faces and how to prevent them
- Confidence that your security solutions are working properly and data and devices are secure
- Reduce IT effort needed to manage security needs
- Keep pace with market, technology and policy changes without compromising security
- Software and services combined into a single solution for predictable and flexible budgeting

Establish ongoing protection

As your organization evolves and grows, so will your security needs. Our experts help extend the effectiveness of your solutions with sustainment services that include ongoing checks, updates and reports to ensure continuous, personalized protection.

Simplify security management

You can combine software and services into a single solution for simplified procurement, operations and management of your entire security toolkit. At a predictable price per seat, per month, you can get the all-encompassing security you need on a term that works for your business. Ask your Dell representative for more details.

	Features	Benefits
