Receive your PowerEdge™ servers ready-to-deploy

Put Servers to work faster

Dell Custom configuration services

Receive PowerEdge servers configured your way

It's time to refresh with the latest technology, but when you're deploying a large quantity of servers in a short amount of time, resources can get stretched thin, and let's face it, consistency can suffer.

Custom configuration services can prepare you to deploy new servers quickly and efficient. We configure them for you, before shipping and right the first time. From system settings for PowerEdge, to services like custom asset tagging, reporting, customer supplied system image, and card placement - we deliver your new PowerEdge servers with expert care, precision, to your specifications, ready to deploy.

Key Benefits

- Save time and money when you receive PowerEdge servers ready-to-deploy

- Scalable, repeatable, global with consistent results'

- Easily choose the service combination to fit your needs time-after-time.

"Shifting Deployment And Support To IT Service Providers Drives Clear Benefits" - Forrester

70%

Of ITDMs using deployment services say they can

Deploy Faster[1]

Save up to

127 hrs

Scale time savings with large orders, saving attended and unattended admin time when deploying 100 servers[2]

Expert care and precision to your specifications

Enhance your configuration with these services

Custom configuration services make it simple to deliver your new technology with expert care, precision and to your specifications ready-to-deploy.

Standard Asset Tags: (Multi Module) A label affixed to the server or ship box which includes printed information about the product such as service tag, model, mac address, etc. Standard tags include the most commonly used fields.

Standard Asset Reports: (Module 920) This report includes the top requested fields and is received at the time the product ships. A report contains information about the computer systems purchased. The report can be used to keep track and manage of assets owned by your customer's organization.

Standard RAID Settings: (Module 1030) Most customers require the RAID configuration to be set prior to first boot. This enables customers to start their site-specific software downloads without manually configuration prior to first boot.

Standard Bundles: (Module xxx) Bundles are a combination of customized services that are designed for customers who value speed, price, and delivery above all else. Bundles enable sales to quickly and confidently select services without having to engage your CS PM prior to order placement.
