

Simplicity, automation and scalability: the non-negotiables for enterprise AI

Modular, automated AI infrastructure that simplifies your AI journey with faster time-to-value and scales securely from pilot to production.

Shifts in Enterprise AI

Adopting AI at enterprise scale is complex, with fast-changing technology, integration hurdles, and evolving business needs creating real barriers. Many organizations struggle to move AI initiatives from pilot to production, especially when faced with hundreds of potential use cases across the enterprise. Identifying where to begin often requires starting from scratch with LLMs with 3rd party AI tools to help accelerate pilot development and demonstrate proof of value.

Enterprises need to achieve simplicity, security, and fast adoption to overcome the complexity of scaling AI across many use cases. DIY approaches often lead to unnecessary risk and significant time invested to get up-and-running and debugging, making a modular, trusted platform essential for confident, streamlined deployment.

Rapidly growing Use cases in enterprise environments

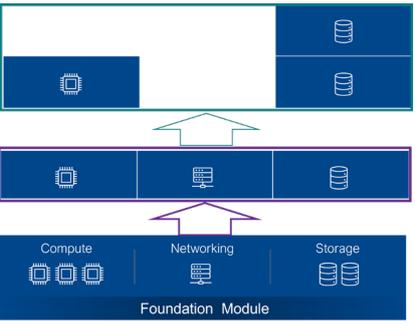

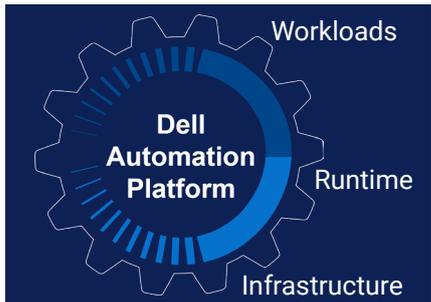

Bridging the AI Adoption Gap: enabling AI workloads at scale

Organizations need a proven, trusted partner who can help them cut through this complexity and unlock business value from their data, while providing comprehensive solutions that grow with their business. The Dell AI Factory with NVIDIA is a comprehensive, end-to-end solution that tackles the complexity of AI adoption, empowering organizations to move quickly from idea to real-world impact. With integrated hardware, software, and services validated for enterprise needs, it enables teams to focus on innovation while simplifying deployment and scaling.

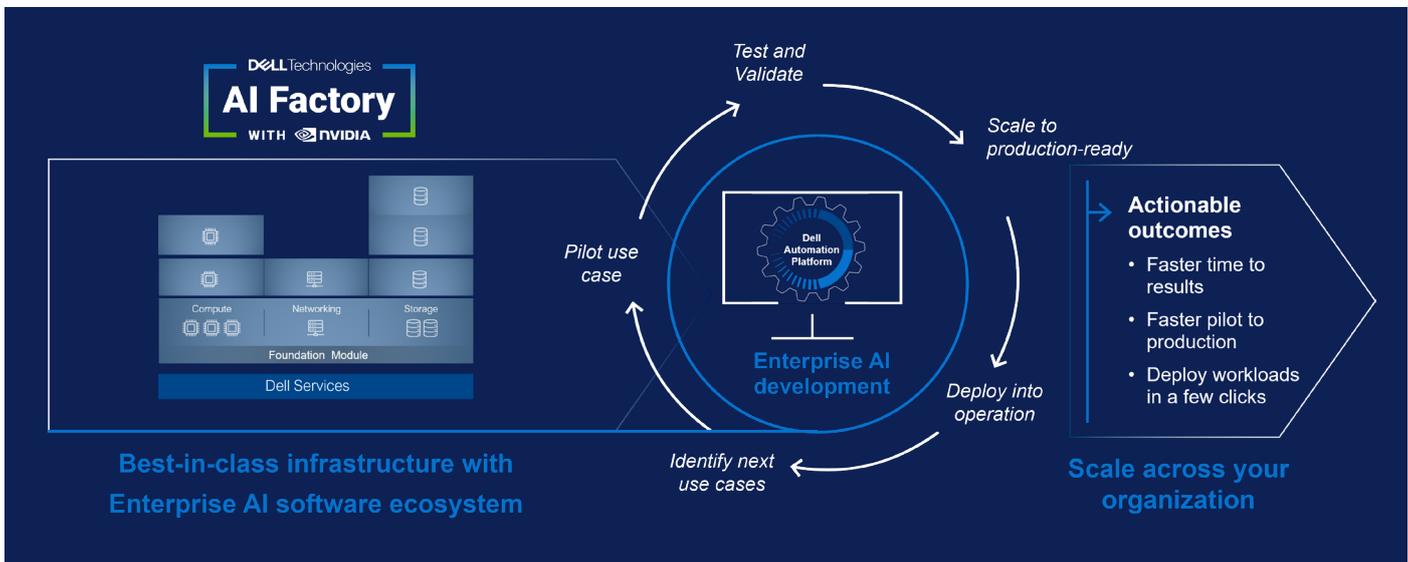

Discover new agility with the Dell AI Factory with NVIDIA modular architecture

The new modular architecture of the Dell AI Factory with NVIDIA lets you build AI on your terms, adapting seamlessly to evolving business priorities and unlocking rapid, measurable outcomes. Designed to flex and grow as your business evolves, letting you launch powerful AI solutions when and where you need them, the **Dell AI Factory with NVIDIA modular Foundation** gives organizations the freedom to adapt and expand AI capabilities at their own pace, eliminating bottlenecks and removing complexity from scaling. This flexible approach translates directly to faster business results, enabling teams to unlock new opportunities and realize value from AI investments sooner.

One solution, multiple workloads, many outcomes	Expand and scale predictably	Automated to accelerate and optimize
 <ul style="list-style-type: none"> • Common infrastructure starting point for Enterprise AI production • Deploy essential compute, storage, networking, software, and automation required to launch quickly. • Right sized to workload requirements, from inference to fine-tuning 	 <ul style="list-style-type: none"> • Scale quickly with validated, pre-configured expansion modules • Futureproof solutions, leveraging current and future NVIDIA GPUs • Manage data growth with validated and curated blocks of storage 	 <ul style="list-style-type: none"> • Deploy AI outcomes quickly and easily • De-risk outcome deployment with standardized and validated deployment blueprints • Speed ROI and reduce skills gap from infrastructure to outcome

Streamline Enterprise AI innovation with Outcome-first Modular Architectures

- Accelerate AI deployment with pre-validated, integrated solutions that reduce setup time.
- Streamline operations and free your teams to focus on innovation, not infrastructure
- Minimize risk with a unified platform architected for enterprise security and compliance
- Support dynamic growth with a solution built for reliable performance at enterprise scale
- Scale AI initiatives flexibly, starting with what you need today and expanding as requirements grow.
- Turn complex data into insights that drive operational efficiency and better decision-making
- Protect intellectual property and sensitive information with robust data governance

Simplifying the Complex for the Enterprise

Turn the promise of AI into real progress with Dell AI Factory with NVIDIA modular architecture and Dell Automation Platform. Build multi-workload AI use cases, from digital assistants to agentic AI, ensuring you can deploy and manage securely from a single platform.

We deliver the expertise, technology, and partnership you need to simplify complexity and shape what's next for your business.
