

Introducing our smallest VxRail **ever.**

VxRail VD-4000

We're talking about the size of a shoebox, small.

Standard-width rack mount chassis

OR

Stackable or wall mountable 12" x 14" chassis

Designed to withstand the **harsh**est uses and environments.

Network Equipment-Building System (NEBS) and Military Standard (MIL-STD) certified

Able to operate in temperatures from **27F to 131F.**

(-5C to 55C)

Filtered bezel to keep your system free from **dust, humidity,** and other **air contaminants.**

38% less power than a standard three node cluster*

Embedded vSAN witness

Self-contained 2-node vSAN cluster in a single, small footprint chassis - **eliminates** the need for data center or cloud-based witness.

Allows for **far-edge deployments** with low latency and low bandwidth constraints.

Extends common operations to the edge with **VxRail HCI System Software**
