It's time to check your SAN performance…

Your storage architecture is key to business agility and success

With our free Dell Live Optics SAN Health tool, you can generate personalized storage network performance and inventory reports to help you prevent operational issues and optimize application performance

1 Make your SAN a business enabler
Avoid application downtime

Reduce troubleshooting and resolution time

Improve capacity planning and productivity

Gain a competitive edge

2 | Easy to run
1 minute to install

3 minutes to audit

0 impact on network performance (You can run it in the background at any scheduled time.)

3 | Share insights with others
Provides an easy-to-read overview for new team members

Professional insight for the CIO

Greater SAN visibility for the entire storage team

4 | Quickly identify congestion risks
Oversubscribed ports and ports with unusually high errors

Zoning issues

Configuration anomalies

5 | Audit multi-vendor environments
Audit fabrics that include any storage and any storage network vendor hardware

6 | Generate topological reports
Eliminate white board SAN management

See down to the device and port level

Get reports in Excel and a consolidated PowerPoint version

Start your free SAN Health audit today. Download here.
