

Dell Pro Rugged Devices

Sanitizing & Chemical Solutions - Testing Guide

Dell tests the Dell Pro Rugged 14 and Dell Pro Rugged 13 laptops, Latitude 7230 and 7030 Rugged Extreme tablets with sanitizing and chemical solutions. This ensures that these Dell Pro Rugged devices can withstand these solutions in the real world and customers can continue to operate, germ-free, in applicable healthcare, chemical, and food-processing environments.

Learn more about the testing procedures and results when using sanitizing and chemical solutions with Dell Pro Rugged devices.

Sanitizing Solution

Tested for use with
Medical Envirocide,
Alcohol and Bleach

Testing Procedure

- To begin the test procedure, an auto-wash mitt was saturated with the solution with 8 sprays
- The surface was then sprayed on, and the system wiped down and sprayed again. 50 such cycles were completed
- This was repeated 5 times taking the number of times system was wiped down to 250 cycles
- This test was repeated for 40 days, with the mitt saturated with the solution every day, taking the number of times the system was wiped down to a total of 10K cycles
