

Residency Services for Data Protection

Experts
accelerate your
technology
transition and
optimize your
data protection
technology.

The force multiplier for your IT staff and data center

Business Challenges

Developing a comprehensive data protection strategy is a key priority for organizations looking to manage explosive data growth. To remain relevant, IT groups need to be agile when introducing new data protection technologies into their storage environments. At the same time, agility must be balanced with budget constraints, the demand for improved productivity, and the need for specialized skill sets. Once new data protection technologies are in place, it's critical that IT staff be able to take advantage of new features with little or no ramp time.

Understanding and implementing best practices to maximize efficiency is key to success. With any new technology, knowledge gaps can exist and need to be addressed. Let Dell EMC Residency Services help.

Service Overview

Dell EMC® Residency Services for Data Protection provide technology experts to help you effectively and efficiently manage your Data Protection environment. Transition to your new data protection capabilities quickly, while keeping your data center running at its peak. With total control of these experts' priorities and time, you'll have the flexibility to adjust resources and budget to your evolving business needs. Free your IT staff from the tactical to give them more time to innovate.

Every resident is backed by Dell EMC expert engineers, solution architects and implementation specialists—supplementing their own skills with an arsenal of proven tools and industry best practices.

Key Benefits

- Increase IT staff expertise with knowledge and best practices sharing from our data protection experts
- Accelerate adoption and maximize capabilities of your data protection technologies
- Optimize the operation and management of your data protection environment

Residents play an important role in the technology adoption lifecycle—with both long and short-term services available. There are two types of Dell EMC Residency Services:

- **Transitional Residents:** provide post implementation management and knowledge transfer related to a new data protection acquisition
- **Operational Residents:** provide day-to-day operational management of the IT infrastructure

Dell EMC offers residents covering the full range of Dell EMC Data Protection solutions, including the Data Protection Suite, Data Domain, NetWorker, SourceOne, and much more.
