

# Dell EMC SD-WAN Solution powered by VMware for Education

## Prioritize mission-critical educational applications with SD-WAN

Education has rapidly shifted from physical teaching and learning environments to virtual ones. Your essential IT staff and educators are now hosting virtual classrooms and they need a way to prioritize mission-critical education applications on their local networks. Dell EMC SD-WAN Solution powered by VMware is here to help, with a full suite of Quality of Service tools and Cloud-based management options that makes traffic prioritization easy and dramatically boosts the performance of today's demanding video conferencing and e-learning applications.

### Ensure application performance for any location or Cloud platform

Combined in one simple and powerful solution, Dell Technologies and VMware deliver a powerful, all-in-one SD-WAN technology that enables you to transform your network for the Cloud era. Dell EMC SD-WAN Solution provides transformational benefits, enabling you to adapt to change and improve availability, all while saving time and money. With features like Dynamic Multi-Path Optimization, Zero Touch Deployments, and Cloud-based Management, you can ensure application performance by prioritizing education apps and minimizing home traffic from gaming, social media, and streaming.

### Transform Networking

Dell EMC SD-WAN Solution powered by VMware delivers advanced Cloud-based capabilities and saves time, money, and resources.

- **Simplicity & Agility** – A full range of all-in-one appliances for simple turnkey WAN modernization
- **Performance & Efficiency** – Boost application performance and reduce WAN costs
- **Scale & Trust** – Full lifecycle support and services from a single trusted vendor

### All-in-One Solution for WAN Modernization

Dell EMC SD-WAN Solution powered by VMware combines purpose-built networking appliances from Dell EMC with SD-WAN software from VMware in an all-in-one solution for complete WAN modernization. VMware has been named a leader by Gartner in the Magic Quadrant for WAN Edge Infrastructure\*.
