See the [Dell Commercial Docks Family Brochure](#) for more information on our entire docking portfolio.

* Via single connection on the Dell Performance Dock WD19DC, functionality reduced to single USB-C, the same as the Dell Dock WD19.

** Latitude Chrome Enterprise 5300 2-in-1 and 5400 are USB-C systems and the recommended dock is the Dell Dock WD19 with 90W power adapter. The Dell Thunderbolt Dock WD19TB and Dell Performance Dock WD19DC are supported but functionality is reduced to single USB-C, the same as the Dell Dock WD19.

Precision 7000 series mobile workstations require more power than 130W, so when docked with the Dell Dock WD19 (130W/180W) or Dell Thunderbolt Dock WD19TB, the workstations need to be plugged in externally for optimal operation. For the best experience with Precision 7530/7540/7550 or 7730/7740 /7750, choose the Dell Performance Dock WD19DC. The WD19DC dock comes with a dual USB-C connector that provides up to 210W of power delivery, so you no longer need an additional power adapter.
