Discover Cloud Native and Kubernetes Data Protection

Benefits
Discover unprotected Kubernetes deployments
Orchestrate protection policies across distributed applications
Protect cloud native applications, databases and persistent data
Backup directly to Enterprise-grade protection storage
Point-in-time recovery of Kubernetes volumes and namespaces

Providing simple data management for our customers who run and develop databases and applications on their chosen data services in Kubernetes

Customers need to protect containerized databases as they expand their operations on Kubernetes

Surveys say
54.2% IT teams deploying cloud-native applications in Kubernetes containers*
45% of all container users are using Kubernetes**
