

Enable greater data reduction and storage performance with the Dell EMC PowerStore 7000T storage array

Compared to an HPE Primera A670 array, the Dell EMC™ PowerStore™ 7000T:

- ✓ Reduced data more efficiently
- ✓ Supported more input/output operations per second (IOPS)
- ✓ Delivered more throughput
- ✓ Responded in less time
- ✓ Saved over 19 minutes when accessing restored data

KEY: ■ Dell EMC PowerStore 7000T ■ HPE Primera A670

Maximize storage efficiency with greater data reduction

3.5x
THE DATA
REDUCTION

Accommodate more users with better storage performance on an 8KB 100% write workload

UP TO
209%
MORE IOPS

Process more data with higher bandwidth

UP TO
135%
MORE BANDWIDTH

Protect applications from experiencing wait times

72%
LOWER LATENCY

Access snapshot restore data faster

17.1x
FASTER ACCESS TO
SNAPSHOT RESTORE DATA

The Dell EMC PowerStore 7000T

The latest storage offering from Dell EMC, the PowerStore 7000T presents a two-node, all-flash NVMe™ solution for organizations. The Intel® Xeon® Scalable processor-powered array takes up just 2U of rack space, enabling enterprises to save on data center costs by delaying the need to expand to new rooms or even buildings. Organizations can scale up and out by clustering PowerStore 7000T arrays together and augmenting storage performance and capacity.
