

DELL EMC POWERPROTECT DP SERIES APPLIANCE

Simply, efficient and agile data protection - Guaranteed.

Simple

- Integrated protection storage and software
- Easy to deploy, scale and manage via single pane of glass across broad application ecosystem
- Save time with single vendor solution for data in hybrid multi-cloud, edge and core

Efficient

- Improved compression with higher performance – up to 65x deduplication and up to 30% higher data compression¹
- Improve SLOs – up to 38% faster backup and up to 45% faster restores²
- NVME flash for faster instant access and restore up to 60K IOPS and 64 VMs³
- Protection for modern applications and optimized for VMware virtual environments
- VMware File-level Recovery, dynamic policies for VMs, application-consistent VM image backups
- Automated monitoring, analytics, reporting, plus search capabilities

Agile

- Extends data protection to private and public clouds with Cloud Tier for LTR and Cloud DR — with no additional hardware
- Reduces costs for LTR capacity management with space estimator tool

Data protection is becoming more complex

Organizations need to efficiently protect an ever-increasing amount of data in a growing distributed ecosystem of applications and workloads — all while improving time-to-value, reducing overall cost and complexity, and planning for growth. Organizations also need to seamlessly incorporate cloud into data protection strategies.

This is not easy to accomplish with many of today's data protection solutions which sacrifice performance for simplicity or require multiple products and vendors—resulting in lengthy and time-consuming deployment while delivering complex and expensive management of fragmented data protection environments.

PowerProtect DP series appliance: Simple, efficient and agile data protection

The DP series is an all-in-one backup appliance that reduces the complexity of managing multiple data silos, point solutions and vendor relationships. The DP series simplifies deployment and management—while delivering powerful, enterprise-grade data protection capabilities for small, mid-size and enterprise organizations at a low cost-to-protect⁴. It is an integrated solution that offers complete backup, replication, recovery, deduplication, instant access and restore, search & analytics, seamless VMware integration — plus, cloud readiness with disaster recovery (DR) and long-term retention (LTR) to the cloud — all in a single appliance.

With the DP series, customers reduce their time-to-protect and become more agile with a solution that's fast, protected more efficiently, can be recovered quickly and is reliable.

Simple to deploy, scale and manage

The DP series enables organizations to protect the largest ecosystem of applications quickly with a single system management console, consolidating workload protection, and eliminating infrastructure or data sprawl. The easy-to-use System Manager simplifies backups and automates daily tasks, including monitoring, management, reporting, analytics and search.

The DP series delivers all-in-one data protection: protection storage and software, search and advanced monitoring and analytics,

Density and performance

- Up to 3 PB (usable), 195 PB (logical) capacity with cloud tier⁷
- Up to 60K IOPS for instant access and restore for up to 64 VMs³

Industry-leading efficiency

- Up to 65:1 data deduplication¹
- Up to 23% lower power consumption⁶

Enterprise applications

- Oracle, SAP, Microsoft Exchange, SharePoint, MS SQL Server, Sybase, MySQL, MongoDB, Pivotal Greenplum, IBM DB2, Lotus Notes, and more
- Hypervisors supported: VMware, Microsoft Hyper-V, and KVM
- All major file systems, including Windows, Linux, HP-UX, AIX, Solaris, Mac OS and more

Native Cloud-Tier

- Public, private, or hybrid
- Supported cloud providers include: Amazon Web Services, Dell EMC Elastic Cloud Storage, Microsoft Azure, VMware, IBM Cloud Object Storage, Google Cloud Platform, Alibaba Cloud and Ceph

Native Cloud Disaster Recovery

- Orchestrated via AWS, Microsoft Azure, or VMware Cloud on AWS

Future-Proof Program

- Peace-of-mind with 3-year satisfaction guarantee, clear price support, refresh & recycle, flexible cloud consumption and up to 65:1 deduplication¹

Dell Technologies On Demand

- Flexible payment options including pay as you go, pay as you use, and provided as-a-Service options

combined with cloud extensibility. It offers integration with VMware, SQL and Oracle management tools so that admins can use familiar UIs.

Powerful cloud, performance and efficiency

The DP series can scale to fit the needs of enterprises with the ability to protect up to 195 PB (logical) of data to the public, private or hybrid clouds with Cloud Tier, with no additional hardware.⁷ Plus, native Cloud DR with end-to-end orchestration allows enterprises to copy backed-up VMs from on-premises IDPA environments to the public cloud with AWS, Azure, or VMware Cloud on AWS —3 clicks to failover and 2 clicks to failback.⁵

The DP series provides support for modern applications like MongoDB and MySQL and is optimized for VMware. It provides fast, single-step recovery of individual files, dynamic policies for VMs as well as complete VMware images, which can be instantly accessed and migrated live from the DP series appliance back to the production environment (using vMotion) while still running, further simplifying and optimizing VM recovery. Plus, instantly access up to 64 VMs with up to 60,000 IOPS to meet the strictest SLAs³.

Data protection search simplifies file-level-recovery (FLR) activities with an easy-to-use search interface. IDPA is also built on the industry-proven Data Invulnerability Architecture (DIA), for encryption, fault detection, and healing.

PowerProtect DP series appliances

	DP4400	DP5900	DP8400	DP8900
BACKUP INGEST	Up to 9 TB/hr	Up to 33 TB/hr	Up to 57 TB/hr	Up to 94 TB/hr
LOGICAL CAPACITY³	80 TB to 4.8 PB ¹ 240 TB to 14.4 PB ²	960 TB to 18.7 PB ¹ 2.8 to 56.1 PB ²	1.9 to 49.9 PB ¹ 5.7 to 149.7 PB ²	6.2 to 65 PB ¹ 18.6 to 195 PB ²
USABLE CAPACITY	8 to 96 TBu ^{1,4} Up to 288 TBu ²	96 to 288 TBu ¹ Up to 864 TBu ²	192 to 768 TBu ¹ Up to 2.3 PBu ²	576 TBu to 1 PBu ¹ Up to 3 PBu ²

¹ Total capacity on active tier only. ² Total capacity with cloud tier for long-term retention.
³ Logical capacity based on up to 50x (DP4400) to 65x deduplication (DP5900, DP8400, DP8900) based on additional hardware-assisted data compression of up to 30% better than previous generation. Actual capacity and throughput depends on application workload, deduplication and other settings.
⁴ If starting at less than 24TB, a simple field upgrade kit is required to bridge from 24TB to larger capacities.

Dell Technologies On Demand

Dell Technologies On Demand delivers a range of inclusive consumption models for IDPA appliances that combine flexible payment solutions with value-added services. Our innovative, all-encompassing solutions enable you to:

- Pay as you go – Make predictable payments over an agreed upon cycle – and grow over time at a pre-determined rate
- Pay as you use – Measure actual usage, set baseline capacity needs with the flexibility to elastically scale on demand
- Provided as-a-Service – Let us manage and maintain the technology, aligned to SLAs, and bill as resources are consumed

¹ Based on Dell EMC analysis of field telemetry from PowerProtect DD series appliances, October 2020. Results applied to PowerProtect DD and DP series appliances. Results will vary. Based on Future-Proof Program data protection deduplication guarantee.

² Based on Dell EMC internal testing with DD Boost protocol on DD9900 and DP8900 with DDOS 7.2 vs. DD9800 and DP8800 with DDOS 7.2, April 2020. Actual results will vary.

³ Based on Dell EMC internal testing using 8KB 100% read to measure peak IOPS, performed on PowerProtect DD9900 and DDOS 7.2, July 2020. Retest performed on DD9900 within DP8900, September 2020. Actual results will vary.

⁴ Based on ESG review commissioned by Dell, "Analyzing the Economic and Operational Benefits of the Dell EMC Data Protection Portfolio", September 2020, evaluating the economic value of the Dell EMC data protection portfolio. Actual results will vary.

⁵ Based on Dell internal testing, February 2020.

⁶ Based on Dell EMC analysis comparing DP8900 vs. DP8800 max configurations recording kVA, August 2020. Actual results will vary.

⁷ Total capacity with cloud tier for long-term retention.

⁸ Dell EMC Information Technology Equipment is compliant with all currently applicable regulatory requirements for Electromagnetic Compatibility, Product Safety, and Environmental Regulations where placed on market.
